

Transformers

Impedance

PRODUCT FEATURES

- Broadband performance
- Excellent wideband VSWR
- Line sizes up to 7 3/16"
- Gas tight
- For both indoor and outdoor use
- FM, VHF and UHF versions

PRODUCT PROFILE

Designed for each application but typically transform 50 Ohm to 75 Ohm impedances and available in all line sizes up to 7 3/16". All designs are broadband UHF. Mechanically robust with silver-plated inner and outer conductors providing excellent wideband VSWR and suitable for both indoor and outdoor environments.
