

Cable Clamp Double

PRODUCT FEATURES

- Fast and easy assembly
- Supports up to 8 cable runs
- Minimises utilised space on towers, reducing wind load

PRODUCT PROFILE

Cable clamp double is a unit designed for safe simultaneous fixation of coaxial cables on mountain surface. All components are specially constructed to work as a whole unit to support quick installation. No additional parts for applying are required. All parts are manufactured according to European standards. The clamps are made of environmental protected plastic which provides UV resistance in all environments.
