

Tool Kits

PRODUCT PROFILE

Tool kits from Exir Telecom provide installers all they need for installing grounding kits quickly and easily. Our grounding devices require only one small opening in the cable jacket in order to function properly. The opening is made using a hot tip cutting tool together with a simple template. Fully illustrated instructions are included with every grounding kit.

The complete tool kit includes a cordless, butane powered cutting tool, one spare tip and templates. Additional cutting tools and templates can be ordered separately as needed.
